INDEX OF SUBJECTS

- Acapnia, heart failure and, 307
 Acetylcholinesterase, in conductive heart tissue, 460-465
 Acid, nicotinic, cerebrospinal pressure and, 389
 Action potentials, conduction pathways in ventricle, 186
 Actomyosin, heart contracture and, 129
 Adenosine triphosphate. *See* ATP
 Adrenal weight in cardiac hypertrophy, hormonal factors and, 350
 Adrenalectomy, DCA following, ascites and, 260-270
 Air pressure changes in thorax, 76-82
 American Heart Association, Inc. committees, 473
 Council for High Blood Pressure Research, 189, 370
 electrocardiographic interpretation, course in, 370
 Fulbright awards, 474
 International Cardiological Congress, 280, 370, 472
 Life Insurance Medical Research Fund, 474
 meetings, 474, 563
 new career investigators, 471
 New England Cardiovascular Society, 561
 postgraduate medical education, 562
 recent publications, 473
 registry of Cardiovascular Pathology, 473
 research awards, 278-280, 366-370
 five-year total, 472
 research fellowships of American College of Physicians, 474
 section on clinical cardiology, 473, 561
 training course for cardiovascular investigators, 280
 American Society for Study of Arteriosclerosis, 190
 Amines, experimental hypertension and, 122-128
 Aminophylline, cerebrospinal pressure and, 390
 Ammonium chloride, electrocardiogram and, 208
 Anastomosis of Beck, studies concerning, 184
 Androgen-estrogen administration in atherosclerosis, 94-98
 Angiocardiology
 catheterization and ballistocardiography, Committee on, 189
 reports on, 189
 Anoxia
 postarteriolar pulmonary vascular resistance and, 238-241
 progressive general, pulmonary circulation and, 230-237
 Antiadrenergic drugs, blood flow and, 40-48
 Anticoagulants in pulmonary edema, 181
 Antifibrillatory drugs, 196
 Antithrombic assay of urine, 322
 Aortic standing wave, genesis of, 145-151
 Arrhythmia, ventricular, due to calcium chloride, 554-559
 Arterial concentration of T-1824, in dye-dilution method, 117-121
 Arterial flow, hepatic, after portal occlusion, 414-418
 Arterial pressure, pulmonary, pulmonary capillary venous pressure and, 340-344
 serotonin and, 354-362
 Arteriolonecrosis, hog renal extracts and, 454
 Arteriosclerosis
 American Society for Study of, 190
 cholesterol, ultraviolet irradiation and, 185
 Arteriovenous fistulas, T-1824 in, 548-553
 Ascites
 DCA after adrenalectomy and, 260-270
 sodium space and body sodium in, 486-490
 Astrup's method of benzidine precipitation, 325
 Atherosclerosis
 cholesterol-free brain fraction and, 530-533
 coronary, prevention of, 94-98
 ATP
 cardiac activity and, 12
 effect of, on heart muscle, 130
 proteins of heart and, 129
 Atrial pressure, left, pulmonary capillary pressure and, 58-61, 337-339
 Atropine in pulmonary edema, 180
 Authorship, trends in, 281
 Ballistocardiogram
 higher frequency phenomena in, 188, 405-409
 psychophysiology research and, 469
 Ballistocardiographic Terminology, 363-364
 Ballistocardiography
 catheterization and angiocardiology, committee on, 189
 reports on, 189
 Base line in ballistocardiography, 363
 Beck, studies concerning coronary sinus anastomosis of, 184
 Benzodioxane in pulmonary edema, 180
 Bicarbonate
 decrease, electrocardiogram alterations and, 206
 increase, electrocardiogram and, 214
 Biopsy, cardiac, 226
 Bipolar leads, 135
 Blocking agents in pulmonary edema, 180
 Blood
 cells, red, pressure-flow and, 247-255
 flows
 antiadrenergic drugs and, 40-48
 cerebral, cerebrospinal fluid pressure changes and, 389-395
 coronary, nitrous oxide desaturation and, 502-508
 hepatic, after portal occlusion, 414-418
 renal, in diabetic coma, 410-413
 plasma expander, electromigration characteristics of, 396-404
 pressure
 in cardiac hypertrophy, hormonal factors and, 349
 diet and, 419-427
 high
 Council for, 189
 after nephrectomy, 439-453
 oxygen administration and, 83-86
 pressoreceptors of carotid sinus and, 3-7
 and saline infusion, effect on ventricular pressure, 62-68
 viscosity in diabetic coma, 410-413
 volume
 load level and, 303
 thorium B red corpuscles and, 102-111
 Body weight in cardiac hypertrophy, hormonal factors and, 349
 Bundles, myocardial, movements of, 166
 Calcium chloride, ventricular arrhythmia due to, 554-559
 Capillary
 pressure, pulmonary, left atrial pressure and, 58-61
 venous pressure, pulmonary left atrial pressure and, 337-339
 pulmonary arterial pressure and, 340-344
 Carbohydrate
 effect of, on blood pressure and heart rate, 419-427
 metabolism, myocardial, 509-517
 Carbon dioxide, cerebrospinal pressure and, 390
 Cardiac. *See* Heart
 Cardiological Congress, International, 190, 280
 Cardiology
 and vascular surgery, Section on, 189

- Congress, 370
- Clinical, Section on, 189
- Cardiopneumogram, intrathoracic volume changes and, 76-82
- Cardiovascular training course, 280
- Carotid
 - infusion, pulmonary edema after, 179-183
 - sinus wall, tension and distensibility of, 3-7
- Catheterization
 - Angiocardiology and Ballistocardiography, Committee on, 189
 - reports on, 189
- Catheter pressures, wedged pulmonary, 371-374
- Cerebral blood flow, cerebrospinal fluid pressure changes and, 389-395
- Cerebrospinal fluid pressure changes, cerebral blood flow and, 389-395
- Cholesterol
 - arteriosclerosis, ultraviolet irradiation and, 185
 - coronary atherosclerosis and, 94-98
 - free brain fractions, atherosclerosis and, 530-533
- Circulation
 - blood, antiadrenergic drugs and, 40-48
 - peripheral, ultrasonics, 539-547
 - pool, disappearance of radioactive potassium from, 284-297
 - time, pulmonary, radiocardiogram and, 429-434
- Coma, diabetic, renal blood changes in, 410-413
- Committee on Catheterization, Angiocardiology and Ballistocardiography, 189
- Committees of American Heart Association, 473
- Conduction pathways of ventricle, action potentials and, 186
- Congestive heart failure, experimental, 491-498
- Contraction
 - myocardial, nucleotide metabolism, 8-11, 12-15
 - ventricular, functional anatomy of, 162-170
- Coronary atherosclerosis, prevention of, 94-98
- Coronary blood flow, nitrous oxide desaturation and, 502-508
- Coronary shock, mechanism of, 466-468
- Coronary sinus
 - anastomosis of Beck, studies concerning, 184
 - flow, right ventricular pressure and, 152-156
- Council for High Blood Pressure Research, 189, 370
- Countershock in defibrillation, 195
- Critical vessel caliber in coronary shock, 466-468
- Cuvette densitometer, evaluation of, 200-205
- DCA
 - following adrenalectomy, ascites and, 260-270
 - in cardiac hypertrophy, 345
- Defibrillation
 - countershock in, 195
 - of ventricles, 191-199
- Defibrillatory drugs, 197
- Deflection
 - R, 135-144
 - T, 135-144
- Denervation, pressure-flow and, 248
- Densitometer
 - cuvette, evaluation of, 200-205
 - photoelectric ear, dye-dilution technique and, 117-121
- Desoxycorticosterone acetate. *See* DCA
- Diabetic coma, renal blood changes in, 410-413
- Diastolic volume, load level and, 303
- Diastolic waves in ballistocardiography, 363
- Dibenamine in pulmonary edema, 180
- Dicumarol in pulmonary edema, 181
- Diet
 - effect of, on blood pressure and heart rate, 419-427
 - in hypertension after nephrectomy, 439-453
- Digitalis, heart failure and, 308
- Dihydroergotamine in pulmonary edema, 180
- Dipole, heart, eccentricity, influence of, 380-388
- Directional changes of cardiac stroke index, methods for, 69-75
- Distensibility of carotid sinus wall, blood pressure and, 3-7
- Dye
 - dilution curves, injection site and, 112-116
 - space in caval constriction, 176
 - technic
 - injection site and, 112-116
 - T-1842 concentration recording and, 117-121
- Dynamics of ventricles in heart failure, 312-320
- Edema, pulmonary, after carotid infusion, 179-183
- Electrocardiogram
 - ammonium chloride and, 208
 - aortic standing wave, 145-151
 - bicarbonate decrease and, 206
 - bicarbonate increase and, 214
 - hydrochloric acid and, 208
 - lithium chloride infusion and, 207
 - plasma pH decrease and, 206
 - plasma pH increase and, 214
 - potassium decrease and, 214
 - potassium increase and, 206
 - R deflection, 135-144
 - respiratory acidosis and, 210
 - sodium decrease and, 206
 - sodium increase and, 214
 - sulfuric acid and, 208
- T deflection, 135-144
- telephone lines in transmission of, 518-522
- Electrocardiographic interpretation, course in, 370
- Electroencephalogram, telephone lines in transmission of, 518-522
- Electrolyte
 - infusion, electrocardiogram and, 206
 - retention, mechanism of, 171-178, 260-270
- Electromigration characteristics of blood plasma expander, 396-404
- Electroturbidimeter, Potter, 331-336
- Endocrine factors in cardiac hypertrophy, 345-353
- Energy metabolism of heart in failure, 298-311
- Eosinophil count in caval constriction, 176
- Erythrocyte concentration, pressure-flow and, 247-255
- Estrogen-androgen administration in atherosclerosis, 94-98
- Evisceration, protein-bound dye disappearance after, 242-246
- Exercise
 - heart failure and, 318
 - in normal individuals, 317
- Expander, plasma, electromigration characteristics of, 396-404
- Failure, heart. *See* Heart failure
- Fellowships and Grants, 471
- Fibrillation, ventricular, initiation of, 193
- Fick technic, evaluation of, 200
- Filtration rate, glomerular, in diabetic coma, 410-413
- Fistulas, arteriovenous, T-1824 in, 548-553
- Fluid retention, mechanism of, 171-178, 260-270
- Footpad of dog, vasomotor innervation of, 16-26
- Friedrich technic, evaluation of, 200
- Frontal-plane vectorcardiogram, heart-dipole eccentricity and, 380-388
- Fulbright awards, 474
- Glomerular filtration rate in diabetic coma, 410-413
- Grants-in-aid, research, 366
- Hamilton method for directional changes in cardiac stroke, 69
- Heart
 - activity of, nucleotide metabolism in, 8-11, 12-15
 - ATP and, 129
 - biopsy, 226
 - bipolar leads, 135
 - dipole eccentricity, influence of, 380-388
 - factors of safety, 99-101
 - dye-dilution curves, injection site and, 112-116

Heart (Cont'd.)

- failure
 - acapnia and, 307
 - congestive, experimental, 491-498
 - digitalis in, 308
 - energy metabolism of, 298-311
 - metabolic substrate and, 304
 - pulmonary capillary pressure in, 321
 - radiocardiogram in, 428-438
 - ventricular dynamics in, 312-320
 - glycogen studies, 228
 - hypertrophy of, hormonal factors in, 345-353
 - muscle, initial length, work, and load relationship, 131
 - load, work, and initial length relationship, 131
 - metabolic substrate in failure, 304
 - mitral stenosis and, 219-225
 - muscle
 - extracted
 - contraction and, 130
 - vs. fresh, 130
 - T deflection and, 135-144

- Ischemia in muscle vs. skin, 44
- Kidney. See Renal**
- Leads**
bipolar, 135
- limb, heart-dipole eccentricity and, 380-388
- unipolar, 138

L-epinephrine, skin and muscle reactions to, 44

Life Insurance Medical Research Fund, 474

Limb
leads, heart-dipole eccentricity and, 380-388
- veins, vasomotor reflexes in, posture and, 27-39

Lipemia-clearing effect of heparin after thorotrast, 523-529

- Lipoprotein composition of dog lymph, 87-93
 - Lithium chloride, electrocardiogram and, 207
 - Liver weight in cardiac hypertrophy, hormonal factors and, 350
 - L-norepinephrine, skin and muscle reactions to, 44
 - Load level, diastolic volume and, 303
 - Lumbosacral trunk, stimulation of, footpad of dog and, 17
 - Lymph, lipoprotein composition of, in dog, 87-93
 - Medulla, electric stimulation of, vasomotor responses to, 479-485
 - Metabolic balances in caval constriction, 176
 - Metabolic studies, cardiac tissue and, 226-229
 - Metabolic substrate, role of, in heart failure, 304
 - Metabolism
 - carbohydrate, myocardial, 509-517
 - energy, of heart in failure, 298-311
 - nucleotide, in cardiac activity, 8-11, 12-15
 - Methacholine, skin and muscle reactions to, 44
 - Metachromatic activity of urine after heparin, 321-330
 - Metachromatic assay of urine, 322
 - Mitral stenosis, experimental, cardiac function in, 219-225
 - Muscle, skin and, blood flow in, antiadrenergic drugs and, 40-48
 - Myocardial bundles, movements of, 166
 - Myocardial carbohydrate metabolism, 509-517
 - Myocardial infarction, oxygen administration and, 83-86
 - Myocardial nitrous oxide desaturation, coronary blood flow and, 502-508
 - Myocardium, contraction of, nucleotide metabolism in, 8-11, 12-15
- Nephrectomy**
hypertension after, 439-453
- protein-bound dye disappearance after, 242-246

Nicotinic acid, cerebrospinal pressure and, 389

Nitrogen content of heart, 229

Nitrous oxide desaturation, coronary blood flow and, 502-508

Nucleotide metabolism in cardiac activity, 8-11, 12-15

Oxygen
cerebrospinal pressure and, 391
- myocardial infarction and, 83-86
- uptake of heart, 229

Papaverine, cerebrospinal pressure and, 390

- Paredrine
 - hypertension and, 122, 125
- Perfused heart, maintenance of, 184
- Peripheral circulation, ultrasonics and, 534-538
- Peripheral vascular resistance, estimation of, 375-379
- Photoelectric ear densitometer, in dye-dilution technic, 117-121
- Plasma
 - electrolytes in caval constriction, 176
 - expander, electromigration characteristics of, 396-404
 - pH decrease, electrocardiogram alterations and, 206
 - pH increase, electrocardiogram and, 214
- Polyvinylpyrrolidone, electromigration characteristics of, 396-404
- Portal occlusion, hepatic arterial flow after, 414-418
- Portal vascular bed, distensibility of, 271-277
- Postarteriolar pulmonary vascular resistance, anoxia and, 238-241
- Postganglionic outflow to footpad of dog, 18
- Posture, vasomotor reflexes in limb veins and, 27-39
- Potassium
 - decrease, electrocardiogram and, 214
 - increase, electrocardiogram alterations and, 206
 - radioactive, disappearance of, from circulatory pool, 284-297
- Potter electroturbidometer, 331-336
- Preganglionic inflows to lumbosacral trunk, footpad of dog and, 19
- Pressoreceptors of carotid sinus, blood pressure regulation and, 3-7
- Pressure-flow, erythrocyte concentration and, 247-255
- Presystolic waves in ballistocardiography, 363
- Priscoline, cerebrospinal pressure and, 390
- Procaine hydrochloride, cerebrospinal pressure and, 389
- Protein
 - effect of, on blood pressure and heart rate, 419-427
 - in hypertension after nephrectomy, 439-453
 - of heart, properties of, 129-134
- Protein-bound dye disappearance after evisceration and nephrectomy, 242-246
- Psychophysiology research, ballistocardiograph in, 469
- Pulmonary circulation, progressive general anoxia and, 230-237
- Pulmonary capillary pressure in heart failure, 312-320
- Pulmonary circulation time, radio-cardiogram and, 429, 434
- left atrial pressure and, 58-61, 337-339
- venous, pulmonary arterial pressure and, 340-344
- Pulmonary edema after carotid infusion, 179-183
- Pulmonary vascular pressure, wedge pressure and, 157-161
- Pulmonary vascular resistance, anoxia and, 238-241
- Pulmonary wedged catheter pressures, 371-374
- Pulsation, venous, hepatic, 256-259
- Pulse, standing wave and, 146
- PVP, electromigration characteristics of, 396-404
- R deflection, 135-144
- Radiation
 - exposure, 110
 - protection, 110
- Radioactive indicators in blood volume studies, 102-111
- Radioactive potassium, disappearance of, from circulatory pool, 284-297
- Radiocardiogram in heart failure, 428-438
- Radiothorium in blood volume studies, 102-111
- Red blood cells
 - concentration, pressure-flow and, 242-255
 - thorium B labeled, in blood volume studies, 102-111
- Reflexes, vasomotor, in limb veins, posture and, 27-39
- Registry of Cardiovascular Pathology, 473
- Remington method in directional changes of cardiac stroke, 69
- Renal blood flow in diabetic coma, 410-413
- Renal clearances, postabsorptive, in caval constriction, 174
- Renal weight in cardiac hypertrophy, hormonal factors and, 349
- Renin in malignant hypertension, 454
- Research
 - awards, five-year total, 472
 - current trends in, 475-478
 - Fellowships of American College of Physicians, 474
 - grants-in-aid, 366
 - in progress, 184-188, 469-470, 560-61
- Respiratory acidosis, increase in plasma potassium, electrocardiogram and, 210
- Respiratory alkalosis, decrease in plasma potassium and, 216
- Rheumatic fever, tricuspid stenosis due to, hemodynamic studies in, 49-57
- Safety factors, cardiac, 99-101
- Saline infusion, ventricular pressure, 62-68
- Scientific program of Section on Clinical Cardiology, 473
- Second International Congress of Cardiology, 472
- Septum, interventricular, movement of, 166
- Serotonin, arterial pressure response to, 354-362
- Shock, coronary, critical vessel caliber in, 466-468
- Skin, muscle and, blood flow in, antiadrenergic drugs and, 40-48
- Sodium
 - bicarbonate, cerebrospinal pressure and, 391
 - decrease, electrocardiogram alterations and, 206
 - excretion, postprandial GFR and, 174
 - increase, electrocardiogram and, 214
 - space, body sodium and, in ascites, 486-490
- Splanchnic bed, standing wave and, 149
- Spleen weight in cardiac hypertrophy, hormonal factors and, 350
- Starvation, myocardial carbohydrate metabolism and, 509-517
- Stenosis, tricuspid, due to rheumatic fever, hemodynamic studies in, 49-57
- Stewart-Hamilton technic, evaluation of, 200
- STH in cardiac hypertrophy, 345
- Stroke
 - index, methods for directional changes of, 69-75
 - work, blood and saline infusion and, 62-68
- Sulfuric acid, electrocardiogram and, 208
- Surgery, vascular, Section on, 189
- Sympathetic vasomotor responses to electric stimulation, 479-485
- Systole, nucleotide metabolism and, 12-15
- Systolic waves in ballistocardiography, 363
- T deflection, 135-144
- T-1824
 - in arteriovenous fistulas, 548-553
 - recording of, in dye-dilution method, 117-121
- Tachycardia, ventricular, oxygen administration and, 83-86
- TEA in pulmonary edema, 181
- Telephone lines in transmission of ECG and EEG, 518-522
- Tension of carotid sinus wall, blood pressure and, 3-7
- Tetraethylammonium chloride in pulmonary edema, 181
- Thoracic vena cava, constriction of, fluid and electrolyte retention in, 171-178
- Thorium B red corpuscles in blood volume studies, 102-111
- Thorium dioxide, lipemia-clearing effect of heparin after, 523-529

- Thorotrast, lipemia-clearing effect of heparin after, 523-529
 Time-concentration analysis, radiocardiogram in, 431
 Tricuspid stenosis due to rheumatic fever, hemodynamic studies in, 49-57
 Tricuspid valve, area of, calculations of, 54
 Tromexan in pulmonary edema, 181
 Ultrasonics, peripheral circulation and, 534-538
 Ultraviolet irradiation on cholesterol arteriosclerosis, 185
 Unipolar leads, 138
 Urinary excretion of heparin, 321-330
 antithrombic assay, 322
 Astrup's method of benzidine precipitation, 325
 metachromatic assay, 322
 uroheparin properties, 326
 Uroheparin, properties of, 326
 Valve, tricuspid, area of, calculations of, 54
 Vascular bed, portal, distensibility of, 271-277
 Vascular pressure, pulmonary, wedge pressure and, 157-161
 Vascular resistance, peripheral, estimation of, 375-379
 Vascular surgery, Section on, 189
 Vasoconstriction
 antiadrenergic drugs and, 40-48
 principle, arterial pressure response to, 354-362
 sympathetic, electric stimulation in, 479-485
 Vasodilatation
 antiadrenergic drugs and, 40-48
 pressure-flow and, 249
 sympathetic, electric stimulation in, 479-485
 Vasomotor innervation of dog's hind footpad, 16-26
 Vasomotor reflexes in limb veins, posture and, 27-39
 Vectorcardiogram, frontal-plane, heart-dipole eccentricity and, 380-388
 Veins, limb, vasomotor reflexes in, posture and, 27-39
 Vena cava, thoracic, constriction of, fluid and electrolyte retention in, 171-178
 Venous pressure
 pulmonary capillary
 left atrial pressure and, 337-339
 pulmonary arterial pressure and, 340-344
 Venous pulsation, hepatic, 256-259
 Ventricles
 conduction pathways of, action potentials and, 186
 defibrillation of, 191-199
 length and width of, changes in, 164
 muscles of, anatomy of, 167
 walls of
 electrical activity through, 539-547
 movements of, 165
 Ventricular arrhythmia due to calcium chloride, 554-559
 Ventricular contraction, functional anatomy of, 162-170
 Ventricular diastolic pressure, blood and saline infusion and, 62-68
 Ventricular dynamics in heart failure, 312-320
 Ventricular fibrillation, initiation of, 193
 Ventricular pressure, coronary sinus flow and, 152-156
 Ventricular response to hypothermia, 185
 Ventricular tachycardia, oxygen administration and, 83-86
 Viscosity
 blood, in diabetic coma, 410-413
 determination, relative, pressure-flow and, 250
 Water metabolism in caval constriction, 176
 Waves in ballistocardiography, 363
 Wedge pressure, pulmonary vascular pressure and, 157-161
 Wedged catheter pressures, pulmonary, 371-374
 Wilson central-terminal voltage, heart-dipole eccentricity and, 380-388
